1. Input victor file

2. open Rotary mark

3. select "mark by split line"

4. double-click on the picture, you will see one desh line. Repeat this action, we can cut the picture into many different part like follows picture.

5. Change part diameter. This number should be little larger than the cup.

For example, diameter of cup is 100mm, we can input 105mm, 110mm or others.

Click OK.
